#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Priority***

1. This application claims priority on Japan 2003-057895 dated 03/05/2003, 2003-019298 dated 01/28/2003 and 2003-013137 dated 01/22/2003. The filing date is 01/22/2004.

***Election/Restrictions***

2. Restriction to one of the following invention is required under 35 U.S.C. 121:
- a. Claims 1-14 drawn to electrical computers and digital processing systems: multi-computer data transferring, particularly computer conferencing/cooperative computer processing class 709, subclass 205.
  - b. Claims 15-20 drawn to electrical computers and digital processing systems: multi-computer data transferring, particularly computer conferencing/demand based messaging, classified in class 709, subclass 206.
  - c. Claims 21-39 drawn to electrical computers and digital processing systems: multi-computer data transferring, particularly remote data accessing/accessing a remote server, classified in class 709, subclass 220.
3. The invention are distinct, each form the other because of the following reasons:
- a. Invention a, b and c are related as subcombination disclosed a presence service as useable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention a has separate functions such as client's modification of presence information for its presentities based on the presence information notified by one or more other presentities; invention b has separate functions such as dynamic rule based buddy list

generation and invention c has separate functions such as selectively presence information notification to specific subscribers. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purpose as indicated is proper.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Refer to the enclosed PTO-892 for details.
